The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 53, 55, 57 and 79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cham et al (AU-B-57853/80).

Cham et al disclose a method of treating psoriasis with at least one active ingredient selected from the group consisting of solamargine, solasonine and mono- and di-saccharides of solasodine (page 17, claims 1-2). Since solamargine and solasonine are known to be useful for the treatment of psoriasis as disclosed by Cham et al, it would have been prima facie obvious to a person having ordinary skill in the art at the time the claimed invention was made to combine solamargine and solasonine in equal proportion into a single composition because such a person would have expected the resulting composition to be useful for treating psoriasis.

Applicant's arguments filed February 21, 2008 have been fully considered but they are not persuasive.

Applicant contends that the disclosure by Cham et al is directed to composition comprising 33% of solasonine, 33% of solamargine and a third portion which is made up of di- and mono-glycosides and free sugars, while the compositions encompassed by the resent claims do not include this third portion. Applicant has also submitted a declaration by Dr. Williams comparing the cytotoxicity of solamargine, solasonine, a combination of solamargine and solasonine and the cytotoxicity of BEC disclosed by Cham et al. Applicant's arguments and the declaration resented have not been found persuasive for the following reasons. Claims 53, 55 and 57 are not limited to the composition tested. Applicant has not provided any evidence that a composition, for example, consisting essentially of tomatine and 26-aminofurostane is more effective than BEC disclosed by Cham et al. With respect to claim 79, said claim is directed to the treatment of psoriasis. Further, said claim is not limited to any mode of administration and therefore encompasses topical administration, intravenous administration and oral administration. The declaration fails to compare the effectiveness of treating psoriasis of the composition encompassed by the present claims and BEC by any mode of administration. Further, it is not clear from the declaration if the amounts of the solamargine and solasonine present in BEC composition tested were the same as in the composition containing just solamargine and solasonine. Thus, the significance of the results presented in the declaration cannot be ascertained.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
